DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 5,6, 8-12, 14-16, 19 and 20 allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a remote control device for a hearing device. Independent claims 1 and 10 identify the uniquely distinct feature of a wrist worn input device which projects one or more virtual input elements on to the back of a human hand and a sensor to register the operation of these elements for control of a hearing device. The closest prior art, Jakob et al. (US 6816600) teaches a manually operated wrist mounted hearing aid control device, DuFaux (US 6611252) teaches a virtual data input device for projecting a virtual keypad on a flat stable surface; and Potkonen (US 6750849) teaches generating a virtual keyboard on a planar surface. The prior art fails to teach projection of virtual control elements on to a moveable portion of the human body. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:30 AM - 3:00 PM.
